

## HTPG Pricing Structure

Batch size	Actual samples (excl. controls)*	Per sample cost (USD)	Total cost (USD)**	Number of SNPs
384 plex (4 x 96)	376	\$2.50	\$960	Up to 10
1536 plex (16 x 96)	1,504	\$2.00	\$3,072	Up to 10

All HTPG genotyping costs are calculated based on multiples of 384 or 1536 samples.

Submissions with total samples less than the standard batch size will result in the rounding up to the next batch price.

*\*Each 96 well plate requires (2) blank controls in wells H11 and H12. Refer to HTPG order form and sampling instructions.*

*\*\* DNA extraction cost included for standard leaf punches. Refer to HTPG sampling instruction for instructions.*

Examples:

200 samples: \$960 (1) = \$960

400 samples: \$960 (2) = \$1,920

600 samples: \$960 (2) = \$1,920

1700 samples: \$3,072 (1) + \$960 (1) = \$4,032
